

1. → Bold text

- Used to make text bold **without semantic meaning** (just styling).

<p>This is bold text.</p>

Output: This is **bold** text.

2. → Important text

- Also makes text bold, but adds **semantic meaning** (important text).

<p>This is important text.</p>

Output: This is **important** text.

3. <i> → Italic text

- Used to make text italic **without extra meaning** (just style).

<p>This is <i>italic</i> text.</p>

Output: This is *italic* text.

4. → Emphasized text

- Makes text italic, but adds **semantic emphasis**.

<p>This is emphasized text.</p>

Output: This is *emphasized* text.

5. <small> → Smaller text

- Renders text in a smaller font.

<p>This is <small>small</small> text.</p>

Output: This is small text.

6. <mark> → Highlighted text

- Highlights text with a yellow background (default).

<p>This is <mark>highlighted</mark> text.</p>

Output: This is highlighted text.

7. → Deleted (strikethrough) text

- Represents deleted/removed text.

<p>This is deleted text.</p>

Output: This is ~~deleted~~ text.

8. <sub> → Subscript text

- Makes text smaller and **below baseline** (e.g., chemical formulas).

<p>H₂O</p>

Output: H₂O

9. <sup> → Superscript text

- Makes text smaller and **above baseline** (e.g., exponents).

<p>2³ = 8</p>

Output: 2³ = 8
